- Borrowers who wish to let the property.
- Interest Only borrowers without a repayment strategy.
- Borrowers who are unable to demonstrate affordability for their monthly mortgage payment and their ongoing living expenses and declared credit commitments.

- The fixed rate or discount periods are not matched to a borrower's refinancing expectations.
- The promotional rate is variable, but the borrowers require certainty of payments for a fixed period.
- The promotional rate is fixed but the borrowers would like to take advantage of rate cuts and are comfortable with rate increases.
- An ERC is present, and the borrowers require flexibility to repay their loan within the promotional period, as the cost of ERCs, will add substantially to the cost of credit.
- There is no expectation they will repay their loan early, but a higher rate of interest is charged in place of an ERC.

4. Customers with characteristics of vulnerability

The Product is designed for a wide target market, and not to meet any inherent characteristics of vulnerability in the target market. However, it is likely to include some customers with characteristics of vulnerability or who will experience vulnerability over time.

The products will align with our Vulnerable Customer Policy and aim to achieve fair value and good outcomes for customers who are vulnerable.

Intermediaries should continue to comply with their obligations to ensure that they treat customers in vulnerable circumstances fairly.

Please contact us if you need any further information about how we support the needs of all our customers in relation to the Product.

5. Our assessment of value

We have developed a comprehensive and robust assessment process which evaluates several aspects of our business to determine the value of our mortgage product. This analysis is used to ascertain whether the Product delivers fair value for customers.

The outcomes of the assessment process are presented to the Board Risk Committee, including the Pepper Money Consumer Duty Champion, allowing for challenge and further investigation before we sign-off the outcomes and share the summary of our assessment with you.

Our fair value assessment has considered the following:

Benefits	Price	Costs	Limitations
The range of features that the Product provides, the quality of the Product, the level of customer service that is provided and any other features that the Product may offer.	The interest rates, fees and charges customers pay for the Product, comparable market rates, advice fees paid to intermediaries and non-financial costs associated with operating the Product.	The cost of funding the Product and any other reductions in costs to the customer made possible by economies of scale.	Any limitations on the scope and service we provide or the features of the Product.

Results of our assessment

Our assessment concluded that the Product continues to deliver fair value for customers in the target market for the Product.
